

Software Engineer

OPPORTUNITY

Ainira Industries is currently seeking applicants for Software Engineers (Front End, Back End, Full Stack) to join our growing teams in Bucharest, Romania and Melbourne, Australia.

COMPANY DESCRIPTION

Ainira Industries have world leading capabilities and we are proud to help Australia stand out from the crowd, as the only product of our kind in APAC. We are transforming the way CIOs, CEOs, Heads of Data Governance and Senior Architects of globally recognised companies look at their data.

We've been recognised by industry experts Gartner & Forrester, as the #1 Global Leader in Metadata Management. We are all about data – Data Discovery, Data Profiling, Information Governance Stewardship, Risk Management and Metadata Management.

RESPONSIBILITIES

- Working in a highly cross-disciplinary environment that interfaces regularly with various teams
- You will be working across one of our 4 teams – Platforms, Scanners & Orchestration, AI/Intelligent Tagging, Business Glossary – reporting into the Senior Stream Lead or Product Owner
- You will get hands on experience with the best technologies – React, Cloud, Graph Databases and Microservices
- As the heart of our business, you will have influence over the continuous development and improvement of the software you are responsible for
- At our daily stand ups, you will have the opportunity to engage and contribute to technical design and product development
- Working in a fast past agile, supportive environment to contribute to sprint releases, development and code reviews
- Your code will be contributing to development of products that will be implemented in the biggest companies in Australia
- You will have the opportunity for limitless career growth, by developing your talents and capabilities whilst being empowered to contribute toward building the future of the company
- You will work in a team orientated environment where every member of the team can impact the future success of the company
- You will work in a collaborative, inclusive culture that embraces diversity
- You will be working in a highly skilled passionate team, who work hard but make time for fun. We regularly hang out at trivia nights and team lunches
- High standards for code quality, maintainability, and performance

SKILLS and ABILITIES

- BSc or MSc in Software Engineering, Computer Science, Game Development, or related
- You are a talented Backend, Full Stack or Front End Developer who has the drive to work on cutting edge technologies
- You are a great problem solver, who likes to think outside the box
- Strong communicator who is excited to work in a fast paced, dynamic & hands-on Agile environment
- You want to work with smart people, people who have built impactful software that is the #1 in its space globally
- You are passionate translating designs and wireframes into high-quality code
- Ability to collaborate in a team environment, and works well under pressure in a dynamic fast-paced environment
- Must be able to accurately communicate ideas, always operate on a professional level, and provide solutions to challenging issues

You will have:

- A strong foundation in Java back end
- React front end experience
- Familiarity with code versioning tools such as Git
- A desire to work on cutting edge Machine Learning, Cloud, Big Data and Graph Database technologies
- An understanding of Continuous Integration and Continuous Deployment

COMPENSATION

The Company offers a competitive compensation and benefits package.
