

# Biofuels Production Technician

## OPPORTUNITY

Ainira Industries is currently seeking applicants for Biofuels Production Technician for its growing portfolio of sustainable projects across Australia and abroad.

## JOB DESCRIPTION

Reporting to the Engineering Manager Renewable Energy, the Biofuels Production Technician will work with in-house professionals and external consultants dedicated to achieving outcomes.

You will find yourself working for a cutting-edge biofuels technology that is globally unique and widely recognised, which has pioneered the green molecules production. Using these molecules, the Company continuously reinvents its business, anticipating the needs of current and future markets.

Well ahead of competitors, we are building long term relationships with our customers, delivering innovative and highly scalable solutions that achieve dynamic growth and make a real difference to all our stakeholders. With a prototype plant at commissioning and trialing stage, and a second plant in final design, we are poised to roll-out our biofuels technology on a large scale over the next five years.

## RESPONSIBILITIES

- Project management of programmes ensuring they proceed in a timely and professional manner from concept to production
- Drive and collaborate across the organisation to introduce and adopt new technologies to enable efficiencies or new opportunities
- Oversee the production and assist in product customisation to maximise plant profitability
- Procurement, and relationship with suppliers and key account customers
- Provide commercial support when required, competitor analyses, and reporting
- Assist as required with market studies, forecasts, budgets
- Identify, establish and operate technology assets that accelerate product and innovation
- Maintain awareness of the competitive market landscape, and industry expansion opportunities

## SKILLS and ABILITIES

- BSc in Chemical or Production/Process Engineering, or equivalent Diploma/Certificate III is required
- Proven experience and knowledge of hazardous facilities, and relevant industry experience ideally gained within oil & gas, petrochemical, pharmaceutical, or plastics industry
- Decisive, innovative, and proactive with the ability to communicate at all levels
- Demonstrated high degree of initiative, creative problem solving, attention to detail
- Excellent team work ethic with willingness to operate cross functionally when required

**COMPENSATION**

The Company offers a competitive compensation and benefits package.
