

# Full Stack Web Developer

## OPPORTUNITY

Ainira Industries is currently seeking applicants for a Full Stack Web Developer to join our growing team in Bucharest, Romania.

## JOB DESCRIPTION

The individual will work as part of a team to design and develop a data infrastructure pipeline. Requires familiarity with NoSQL databases, and knowledge of Python and JavaScript.

## RESPONSIBILITIES

- Supports the various data centre components including in-house file storage, database server, backup and recovery systems, and cloud infrastructure for remote access
- Acts as a product owner to make sure internal customers and external vendors have access to data at all times
- Optimise data sets in support of machine learning scientists
- Monitor database and server performance and maintain strict version control

## SKILLS and ABILITIES

- BA or BSc degree in Computer Science or Information Technology/Systems
- 5+ years' of experience with software development
- 3+ years' of experience in working with Python, Go, Java Script
- Experience with NoSQL and related technology infrastructure implementation
- Experience in working with large amounts of data in a high availability environment
- Strong practical understanding of Deep Learning infrastructure on GPUs
- Ability to collaborate in a team environment, and works well under pressure in a dynamic fast-paced environment
- Must be able to accurately communicate ideas, always operate on a professional level, and provide solutions to challenging issues

## COMPENSATION

The Company offers a competitive compensation and benefits package.
